QUESTIONNAIRE

Please tick the boxes next to the services listed below where you require further information or where you see a need for action and send it to the contact details provided.

1. General Areas

- 3D Measurement Technology
- Initial Sampling
 - In accordance with VDA (EMPB) or QS 9000 (PPAP)
 - Support or Full Service
- Material Testing
- Logistics Services
 - Inhouse Logistics
 - Container Management
 - Inventory and Material Management
- Quality Management Consultancy to avoid cost
 - Establishment and further development of QM Systems
 - Auditing of systems, processes and products
 - Risik Analyses – securing of maturity level
 - Instruction, Training & Coaching of QM – Basics
 - FMEA – PPAP – APQP – 8D - KVP
- Quality Optimisation of the production process to reduce cost
 - Project Management planning, concept, implementation
 - Process Management & process for corrective measures
 - Process Optimisation along the Supply Chain
 - Supplier Development (SQA)
 - Advanced Quality Planning I APQP
 - Interim Management
 - Quality Management services to secure production processes
 - Tailored location concepts for emergency planning support and establishment of a high-quality firewall
 - Resident Engineer and troubleshooting on-site
 - Project Coordination
 - Complaint Processing, 8D reporting
 - Temporary start-up support and quality process support

- Quality gates and line supervision – 24h
- Dynamic goods receipt and outgoing goods control
- Testing, sorting & reworking I breakdown service
- Documentation including fault analysis
- End of line tests
- Field activities, recall management I worldwide
- 🔗 Personal Leasing
 - Temporary Project Management as Personnel Leasing service
 - Interim Management for staff based on personnel Leasing
 - Personnel Support in production, logistics and administration

2. 3D Measurement Technology

- 🔗 2D Measurement Technology
- 🔗 3D Measurement Technology
- 🔗 CT-Services
- 🔗 Digitalisation
- 🔗 Initial sample creation of CAD files
- 🔗 FaroArm
- 🔗 Manufacturing of gauges
- 🔗 Reverse Engineering
- 🔗 Mould construction (making)
- 🔗 Free-form measurement
- 🔗 Subcontract measurement
- 🔗 Multi joint arm
- 🔗 Measurement technician on site (operator and programmer)
- 🔗 Offline programming
- 🔗 Online programming
- 🔗 Measuring of gauges
- 🔗 Measuring of parts in our measuring centre
- 🔗 Fixture construction
- 🔗 Training of your employees in coordinate measuring technology (AUKOM stage 1)

3. Material testing

Non-destructive material testing

- 🔗 Computed tomography
- 🔗 Radiographic test (X-ray)
- 🔗 Magnetic particle inspection
- 🔗 Penetration (penetrant flaw detection)
- 🔗 Reflection measurement (photometry)
- 🔗 Visual inspection
- 🔗 Ultrasound
- 🔗 Eddy current testing

Destructive material testing

- 🔗 Analytical examination
- 🔗 Component testing and testing of semi-finished products
- 🔗 Electrical and optical testing
- 🔗 Corrosion
- 🔗 Mechanical-technological testing
- 🔗 Mechanical testing laboratory
 - Metal/ spectral analysis
 - Metallography
